MEDICAL INFORMATION EVERY LAWYER AND JUDGE SHOULD KNOW

OVERVIEW:

This four-hour live seminar will present the terminology and application of the AMA Guides to common parts of body injured in work related injuries. Many WPI ratings are missed or misapplied by attorneys, judges, and physicians due to the lack of information about the anatomy, physiology, nomenclature, diagnosis, and functional losses associated with work related injuries.

A team of experts who have extensive knowledge and experience with the application of the AMA Guides 5th

Edition will present specific guidance with use of examples to demonstrate the depth of knowledge attorneys, judges, and even some physicians need to have to provide accurate WPI ratings in workers' compensation cases. This seminar will assist participants in understanding medical-legal issues, preparing for cross-examination of physicians, and how to understand complex WPI ratings using anatomic, diagnostic, and functional loss determinations.

DATE AND TIME

Jul 11, 2015

8:30 AM - 12:30 PM

LOCATION

Pomona Valley Mining Company

1777 Gillette Rd

Pomona, CA 91768

Room: TBA

INSTRUCTED BY

Robert Rassp

Hon. David Pollak

Frank Christine

DISCUSSION:

- ▶ Common medical terminology that determines the location and importance of a diagnosis
- ▶ Specific application for injuries to the Spine, Shoulder, Knee, Cardiovascular System including the Heart, and other body systems or organs
- ▶ How to properly rate certain conditions, depending on accurate diagnostic criteria
- ▶ How a WCJ applies Blackledge vs. Bank of America (WCAB en banc decision) in formulating formal rating instructions
- ▶ Did you know that a "Mumford Procedure" is the same thing as a "distal clavicle resection arthroplasty?"
- ▶ Did you know that there is a scheduled WPI rating for it in Table 16-27?
- ▶ Did you know that Table 16-18 conflicts with Table 16-27 for the loss of the AC joint from a resection arthroplasty?
